

Bulb Catalogue 2025-2026

Our Lighting Expertise

Experts in the field

Our experienced team, in collaboration with our partners, is committed to the production and supply of high quality auto parts and accessories.

Highest quality Standards

Our products are manufactured to meet the highest European quality standards, ensuring excellence and reliability in every detail.

Competitive prices

Our pricing and exclusive deals are highly competitive, offering exceptional value while maintaining the highest quality standards.

For All Vehicles

Light explained

Halogen

- The classic in-vehicle lighting: a glass capsule filled with halogen gas with a tungsten wire which, when heated with electricity, emits light
- Strong price-performance ratio
- Easy replacement of the bulb

Xenon

- Better light output with up to twice as much light*
- Gas discharge lamps produce light by passing current through ionised xenon gas at high pressure
- Brighter light colour: 'more light' provides brighter and wider illumination of the road
- More complex maintenance required

Plus 200% Halogen Bulb Range

- Uncompromising Safety on the Road
- Achieve unparalleled performance, delivering up to 200% more light on the road ahead.
- The brightest halogen bulb in our range, surpassing the highest industry performance standards.
- 100% pure xenon gas and specialized coating.
- Silver top design for a visually appealing appearance.

Germagen Heavy-Duty Long-Life Bulbs

Engineered to withstand the rigorous demands of modern driving, Germagen heavy-duty long-life bulbs provide exceptional durability and reliability.

- Extended Lifespan – Lasts up to three times longer than standard bulbs, reducing the need for frequent replacements.
- Robust Performance – Designed with a reinforced filament for enhanced durability.

Ideal for drivers seeking longevity and performance without compromise.

XENON HID Bulb Range (HIGH INTENSITY GAS DISCHARGE)

HID (High-Intensity Discharge) gas discharge bulbs are an increasingly popular choice for automotive lighting, offering a significantly brighter and more efficient alternative to traditional halogen bulbs. Emitting a super bright white light of up to 6000 Kelvin, they enhance visibility and driving safety, particularly in low-light conditions.

With a lifespan of up to 3000 hours, HID bulbs provide long-lasting performance. These bulbs require a high ignition voltage of up to 24,000 volts, making professional installation strongly recommended to ensure optimal functionality and safety.
